

12M AEROSTAT SYSTEM

TCOM's 12M aerostat system is the most compact & portable solution of its kind available today. The 12M offers rapid deployment and retrieval, enabling operators in the field to obtain actionable surveillance data faster than ever before.

Tactical Class aerostat systems can be customized with payloads that include video surveillance, infrared and SIGINT / COMMS Relay equipment, enabling forces to obtain actionable data, even in the most remote and challenging terrain.
